# GLADIOLUS

## THE FLOWER BEAUTIFUL

A Most Valuable Summer Flower For Cutting  
and Garden Decoration

The Gladiolus bulbs offered at price quoted are for large size bulbs,  $1\frac{1}{4}$  to  $1\frac{1}{2}$  inches in diameter, and will produce the largest blooms and tallest spikes.

The medium size bulbs are  $\frac{3}{4}$  to  $1\frac{1}{4}$  inches, will also produce a fine spike of flowers, except that they will not have quite so many blooms and come into bloom 10 to 15 days later.

Small size bulbs,  $\frac{1}{4}$  to  $\frac{3}{4}$ , will only produce a few blooms the first season, but will make fine large bulbs for next season planting—and is an inexpensive way of securing some of the newer high priced kinds at a low cost.

### PREPAID PRICES

All orders will be sent with transportation charges prepaid either by parcel post or express, and everything will be well packed to arrive in first class condition.

**NOTE**—Due to an unusually heavy wholesale demand for Western Oregon grown Gladiolus bulbs, stocks are rapidly becoming exhausted. To avoid disappointment in getting the varieties wanted, I would advise that you place your order soon, and not wait too late, as most kinds will be sold out early.

All orders accepted subject to prior sale.

# NEW AND RARE GLADIOLUS OF SPECIAL MERIT

Some of the largest and finest American and foreign introductions up to date.

10c each      3 for 25c      12 for 80c      100, \$5.00

# MILLERS GIANT FLOWERING DELPHINIUMS.

These new early giant flowering Delphiniums are the result of cross-pollination of a large type of Delphinium Belladonna and the giant flowering Wrexham, or Hollyhock strain. They bloom early like the Belladonna, but have the same general character of growth that has distinguished the famous Wrexham type,

Many of my plants grow 5 to 8 feet tall and carry immense big spikes, with 2 to 3½ feet of bloom, flowers measuring 2 to 2½ inches across.

These new Delphiniums come in a wide range of beautiful new shades of blue rich purple, mauve orchid, rose pink, rosy magenta, sapphire and white, many with wonderful two tone effects, some have very attractive centers of white, yellow, gold brown, tan and black.

Delphiniums can be successfully planted either in the fall or early spring, (plant 18 in. each way). They thrive well in any good garden soil.

A Stock of these Plants can be easily raised from Seeds.

## DELPHINIUM SEEDS

**TRIAL PACKET, about 50 Seeds 35c with cultural directions.**

Extra Selected Seeds from Special plants, trade packed.....\$1.00

## BABY DELPHINIUM PLANTS

**NOTE**—I have completely sold out of baby Delphinium plants this spring. But I will have a good supply of husky, healthy heavy rooted transplanted baby plants ready after September 15th for planting this next fall.

Booking orders now for fall delivery.

20c each      12 for \$1.50      100, \$10.00 Prepaid

## CONSIDER THE BEAUTIFUL

# Regale Lilies

One of the very finest of all the lilies. Color, ivory white shading to pink, inside fleshed sulphur yellow.

Regale Lilies are easy to grow and hardy, while the bulbs are best planted in the fall. They can also be planted in the early spring with very good results. Planted where they are to remain for several years and if not disturbed, they will increase in height and produce more blooms each succeeding year.

Cultural directions sent with bulbs.

**NOTE**—Have large lots of Regale Lily bulbs in good dormant condition ready to grow for you soon after planting. But please send your order before April 10th, as all unsold Lily bulbs will be planted out soon after this date.

## Tigridias

### Mexican Day Lilies, or Tigerflowers

There is a certain wild attractiveness about the vivid barbaric colors of these bright charming flowers, that reminds one of the gay costumes of pretty gypsy maidens. and like the ever-wandering, roving gypsies, these interesting bulbous plants bloom for a day, then they fold up their petals, and disappear into the night. But, unlike the gypsies, they reappear the third or fourth day with another glorious bloom.

If one plants strong, mature bulbs in a rich soil, and given good care, with plenty of moisture, they will continue to bloom from July until frost.

Their brilliant and beautiful colors are crimson and scarlet, flame orange and yellow, some with pink, lavender, cream, white and buff, all with gorgeously spotted halos about the centers.

The best time to plant is about the first part of May after the soil is thoroughly warmed up. A good rule to follow is plant tigridias when bulbous iris or tulips have finished their bloom. Dutch bulbs can then be replanted when the first frost nips the tigridia tops.

The best bulbs to plant are natural divisions (two to four year old growth). These natural division cost a little more but they are worth the difference, as they give better results, and produce more blooms over a longer period.

Cultural directions sent with each order.

Mr. F. T. Smith, a fellow-floriculturist, has specialized in growing tigridias for the past ten years, and by hybridizing and selection has been successful in developing what I honestly believe to be one of the finest strains of tigridias, and it gives me great pleasure to have the privilege to introduce these charming flowers to my customers.
